Monday June 25, 2001

Dear President nor-elect George Bush;

I urge you to reconsider your position to repeal the Federal Contractor Responsibility Regulations. It is indefensible that the United States government through its many federal contracts should allow gross negligence by companies that ignore worker protection rules, environmental laws and consumer protection regulations that other companies would be expected and liable for if they violated. Please reconsider your actions in light of what this and future generations will view and live through.

Sincerely

Keith Pil
